  - Users
  - Roles
  - Policies
  - Identity providers
  - Account settings
  - Root access management
  - Temporary delegation requests New
- Access reports

Roles (9) Info

An IAM role is an identity you can create that has specific permissions with credentials that are valid for short durations. Roles can be assumed by entities that you trust.

Delete | Create role

Role name	Trusted entities	Last activity
AWSServiceRoleForAmazonEKS	AWS Service: eks (Service-Linked Rol	383 days ago

us-east-1.console.aws.amazon.com/iam/home?region=us-east-1#/roles/create

Account ID: 8160-6914-8693
rsoaccount-new/68034028d24717cbb9270727

IAM > Roles > Create role

- Step 1 Select trusted entity
- Step 2 Add permissions
- Step 3 Name, review, and create

Select trusted entity Info

Trusted entity type

- AWS service — Allow AWS services like EC2, Lambda, or others to perform actions in this account.
- AWS account — Allow entities in other AWS accounts belonging to you or a 3rd party to perform actions in this account.
- Web identity — Allows users federated by the specified external web identity provider to assume this role to perform actions in this account.
- SAML 2.0 federation — Allow users federated with SAML 2.0 from a corporate directory to perform actions in this account.
- Custom trust policy — Create a custom trust policy to enable others to perform actions in this account.

Use case

Allow an AWS service like EC2, Lambda, or others to perform actions in this account.

Create topic

Details

Type | Info
Topic type cannot be modified after topic is created

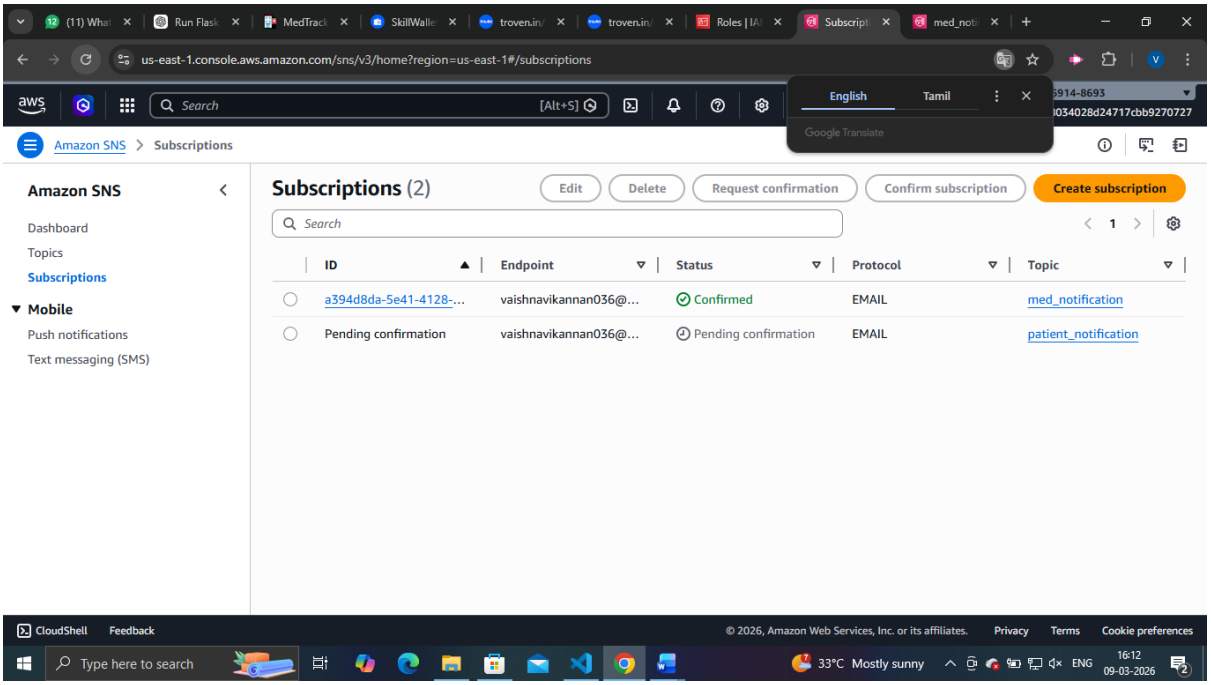
- FIFO (first-in, first-out)
  - Strictly-preserved message ordering
  - Exactly-once message delivery
  - Subscription protocols: SQS
- Standard
  - Best-effort message ordering
  - At-least once message delivery
  - Subscription protocols: SQS, Lambda, Data Firehose, HTTP, SMS, email, mobile application endpoints

Name

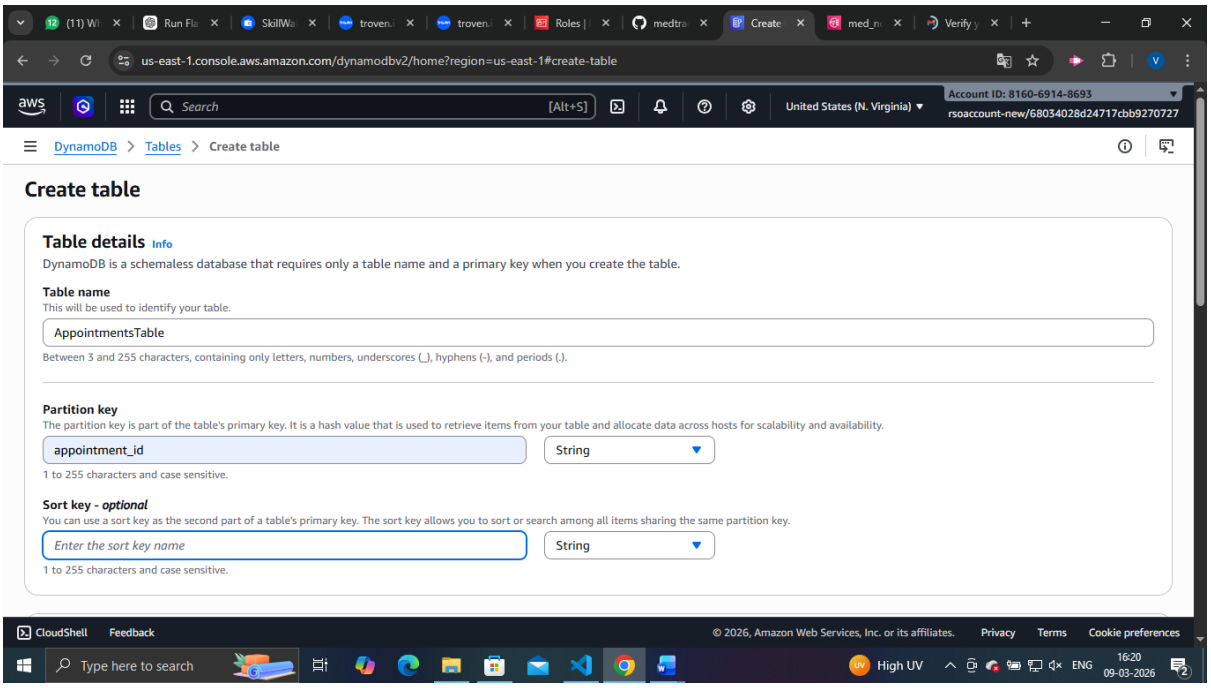
med_notification

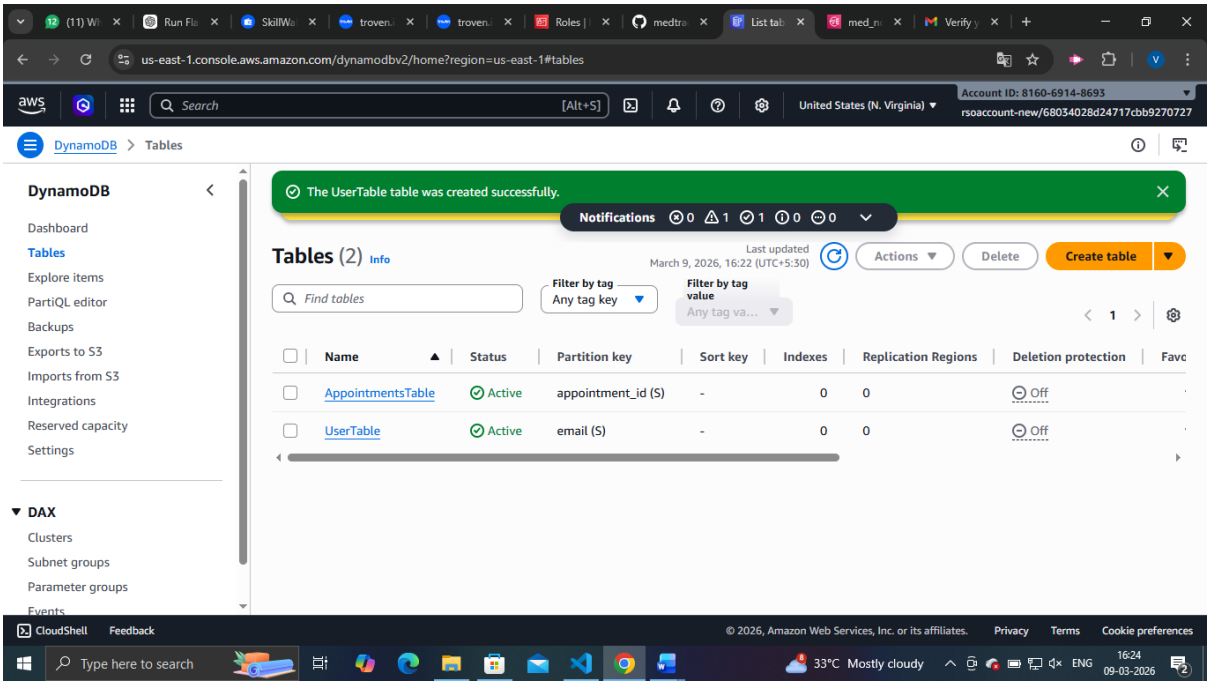
Maximum 256 characters. Can include alphanumeric characters, hyphens (-) and underscores (_).

Display name - *optional* | Info
To use this topic with SMS subscriptions, enter a display name. Only the first 10 characters are displayed in an SMS message.



STEP:5 Create DynamoDB Table





STEP:6 Create EC2 Instance
